

K-LOVE serves me on a daily basis with inspiration, resolve, and emotional support which enables me to be a positive, contributing member of my community. Without it I probably wouldn't go seek any type of support as it reaches a need that isn't easily or comfortably addressed by many as myself - emotional and spiritual support. It is so easily accessible that it is such a vital part of my life.

Without the K-LOVE broadcast I would probably be not as positive and dedicated to contributing to society. The local community would surely suffer and be forced to purchase every cd of every artist they listen to. An impossibility financially speaking. There is a great variety of music, most of it contemporary which is completely relevant to our local community of listeners.

It is in our public interest to keep programs like K-LOVE going in order to maintain a positive, functioning, contributing, and yes, even praying community. Our society, without these things, would crumble for certain. These assets - provided only by such strong positive programs as K-LOVE are what keep this country as blessed as it is. Take it away, take away the blessings.
